PROJECTS

MY HOME (hotel booking website)-

Technology Stack: MERN (MongoDB, Express.js, React, Node.js)

Description: Developed a comprehensive hotel booking website, MyHome, utilizing the MERN stack. The platform allows users to search for hotels, view detailed information, make reservations, and manage bookings. Key features include:

- **User Authentication:** Secure user login and registration using JWT.
- **Hotel Search and Filter:** Advanced search functionality with filters for location, price, and amenities.
- **Booking Management:** Users can book rooms, view booking history, and cancel reservations.
- **Admin Panel:** Admin interface for managing hotel listings, room availability, and user accounts.
- **Responsive Design:** Ensures a seamless user experience across various devices.

INTERNSHIPS

WSA ACADEMY:	**02/2024- remote**

MERN stack intern- Completed intensive internship focusing on MERN stack (MongoDB, Express.js, React.js, Node.js) development. Gained hands-on experience in full-stack web development, including building dynamic user interfaces, implementing server-side logic, and optimizing databases.
